Log of Meeting

Date of Log Entry: March 11, 1996
Source of Log Entry: Susan Kyle, Ph.D., Project Manager *SJK*
CPSC
Attendees: See attached sheet

Summary of Meeting

The meeting was chaired by Mr. Keith Mowry from Underwriters Laboratories representing the ASTM F15 Committee.

Discussion focused on revisions to a working draft standard for bean bag chairs. Issues considered included label specifications, durability testing test weight and drop height, specifications for seam testing, torque and tension testing, specification of allowable opening size after testing, and inclusion of a prohibition of small parts resulting from testing.

It was decided that various members of the working group would provide wording for the standard in approximately one week and that a letter ballot of the draft standard would be circulated after revisions are received. It was agreed that a subcommittee meeting would be held to review anticipated negatives. This meeting will be scheduled after the standard is balloted.
